Practical Time Management Tools for Managers-Staying focused on the job

Learnings:

Time management is crucial for balancing professional and personal responsibilities, requiring effective strategies to enhance focus at work. Creating a comfortable environment is the first step, which can be achieved by adjusting workstations ergonomically, personalizing spaces, and eliminating distractions. A well-organized, clutter-free workspace ensures that items present contribute to productive activities.

Taking regular breaks is vital, with a recommended break ratio of 1:6 (ten minutes per hour), as breaks refresh the mind and improve focus. Written plans provide clear direction, helping to prioritize tasks and maintain a structured approach to work. Visualizing success is also a powerful tool, as the brain processes visualization similarly to actual experiences, enhancing motivation and performance.

Visualization meditation specifically aids in stress relief, problem-solving, and boosting self-confidence. By focusing on positive aspects of tasks and thinking optimistically, individuals can transform their approach to work. Tarun Mathur, a senior Project Manager at KLPM Gurgaon, exemplifies this by fostering creativity and fun in his team’s tasks, using incentives like fun hours and milestone celebrations to maintain high morale and productivity.

Additional tools for improving focus include breathing techniques, stretching, music therapy, yoga, mnemonics, and speed reading. These methods can mitigate common workplace challenges such as interruptions, distractions, and poor posture. Yasir Jamil, a Team Manager at a prominent MNC in Pune, demonstrated the effectiveness of visualization and music in enhancing his team's focus.

Managers should encourage research on ergonomics, breathing techniques, and related topics to create a more enjoyable and productive work environment. Assessment questions might include the impact of visualization on focus and the role of music in concentration. By incorporating these strategies, individuals can significantly improve their focus and overall productivity.

2

Building Effective Teams: Tools for the young Manager

Learnings:

Team building is a vital process for managers aiming to enhance team performance across various organizations, such as businesses, schools, sports teams, and nonprofits. Effective team building involves activities that improve communication, create a pleasant workplace, motivate members, and foster self-awareness among participants. Key factors for successful teamwork include goal clarity, a risk-tolerant environment, open communication, a strong sense of belonging, recognition of individual uniqueness, and encouragement of creativity and diverse perspectives.

Ten essential elements ensure successful teamwork: understanding goals, fostering a risk-tolerant environment, building trust, maintaining open communication, nurturing a sense of belonging, recognizing team members' unique contributions, encouraging creativity and diversity of thought, regularly evaluating team processes, implementing procedures for problem resolution, and practicing participative leadership. When these factors are met, teams can achieve success and experience a rewarding sense of collaboration.

The movie "Chak De India" exemplifies effective team building. The coach of the Indian Women's National Hockey Team overcomes initial teamwork deficiencies through commitment and team bonding, ultimately leading the team to win the hockey world cup. This narrative underscores the significance of teamwork and dedication in achieving success in sports.

Core management skills are crucial for developing a team. Managers must focus on team development, effective communication, and active listening. Understanding that teams are composed of individuals with diverse perspectives and abilities is essential. Regular feedback, delivered with care and concern, fosters team development. Managers should master meeting management skills, such as setting agendas, time management, and updating action points.

Effective communication with superiors is critical for a manager's success. Understanding a boss's expectations, seeking advice, and negotiating resources are important. Managers should protect their teams from unreasonable pressures and seek coaching or mentoring when needed.

Managerial discipline is essential, addressing issues like disrespect, policy breaches, dishonesty, and misuse of resources. It's crucial to gather information before taking disciplinary action to prevent worsening issues and maintain team morale. New managers should focus on developing management and people skills, effective communication, appropriate use of authority, regular consultations with superiors, and proactive problem-solving to build a strong, cohesive team. By avoiding common mistakes and developing essential skills, managers can create a successful and high-performing team.

3

Problem Solving Techniques

Learnings:

Problem-solving techniques are crucial for navigating challenges and generating effective solutions. One widely used technique is brainstorming, which merges a relaxed environment with lateral thinking to foster creative idea generation. In a practical example, a mall stall promoting a new internet data card with a 25% discount aimed to build a database and sell 100 cards. Here, brainstorming involved setting a comfortable atmosphere, defining the problem, and allowing ample idea generation without criticism or interruption. Post-brainstorming, the best ideas were reviewed and selected through consensus. This technique helps break stale thinking patterns, promotes team bonding, and brings diverse experiences into the problem-solving process.

A notable example includes a brainstorming session at Google, where participants, in a relaxed setting, freely shared ideas and asked open-minded questions. This underscores the importance of a non-judgmental environment for idea generation.

Another effective problem-solving technique is the 5 Whys strategy, popularized by the Toyota Production System in the 1970s. This involves repeatedly asking "Why?" to uncover the root cause of a problem. For instance, if a senior executive fails to meet sales targets, the 5 Whys might reveal issues like inadequate training or competence. Similarly, for a malfunctioning two-week-old washing machine, asking "Why?" five times might uncover issues such as a missing shaft seal leading to motor overheating. The simplicity and effectiveness of the 5 Whys make it a valuable tool for root cause analysis.

Lastly, the Cause and Effect Analysis, or Fishbone/Ishikawa diagrams, is a structured method for identifying all potential causes of a problem. This involves identifying the problem, labeling major factors, and brainstorming possible causes for each factor, depicted as smaller lines off the "bones" of the fish. This thorough approach helps in pinpointing the most likely causes for further investigation.

Together, these techniques—brainstorming, the 5 Whys, and Cause and Effect Analysis—provide robust frameworks for addressing and solving problems by encouraging creativity, thorough analysis, and a systematic approach to uncovering root causes.

4

How did Nykaa become so successful?

Learnings:

Nykaa, a pioneering cosmetics brand in India, became the only profitable unicorn to go public in 2021, marking a significant milestone with its stock market debut. Founded by Falguni Nayar, an IIM-Ahmedabad alumna and former managing director of Kotak Mahindra Capital, Nykaa has catapulted Nayar to the status of India's richest woman, ranking 33rd in the top 100 billionaires list.

Nykaa identified a crucial market gap by offering 100% verified, authentic beauty and wellness products online. By partnering with both national and international brands, Nykaa ensured the delivery of genuine products directly through its e-commerce platform, targeting middle to upper middle class women seeking quality and confidence in their beauty regimen. Despite initial technical hiccups like website crashes, Nykaa addressed these issues swiftly and maintained robust growth.

The brand's success hinges on its ability to remain engaging and deliver a superior shopping experience. Nykaa’s strategic marketing leverages video content, SEO, influencer collaborations, and email campaigns to foster a strong online presence. This digital strategy is complemented by an expanding physical footprint, with over 70 retail stores across India within three years.

In 2018, Nykaa diversified into fashion and men's grooming with Nykaa Fashion and Nykaa Man. During the COVID-19 pandemic, Nykaa adapted by launching an essentials-only online store, offering products like sanitizers and masks, demonstrating resilience and agility in crisis.

Despite competition from brands like Purplle, Plum, MyGlamm, Scentials, and FabAlley, and a legal challenge from L'Oreal over copyright infringement that was eventually settled, Nykaa’s clear vision and strategic execution have been key to its success. The company’s inclusive growth approach ensures that all collaborators thrive, solidifying Nykaa's position as a leader in the beauty and wellness industry.

5

21st Century Leadership Skills

Learnings:

The evolution of leadership reflects the transformation of human societies, progressing from agrarian to industrial, to informatic, and now digital economies. Each stage has demanded different leadership styles and competencies. The Fourth Industrial Revolution, marked by the fusion of internet and physical realms, highlights the necessity for leaders to integrate digital fluency with traditional leadership skills.

Leadership today faces disruption and macro-level changes due to rapid technological advancements and the shift towards knowledge-driven economies. Leaders must navigate technological obsolescence, relentless competition, and customer-driven markets with shortening product life cycles. The accelerated pace of technology dictates the tempo for markets and economies, making constant adaptation essential.

Modern leadership demands agility and the ability to thrive amidst uncertainty and continuous change. Business environments are becoming more fluid and complex, necessitating innovative and adaptive strategies. Leaders must exhibit strength and intelligence, embracing Darwinian principles to survive and succeed in volatile conditions. Effective leadership requires comfort at the edge of chaos, the ability to build enduring relationships, and the courage to take bold actions while safeguarding organizational interests.

Key competencies for contemporary leaders include agile thinking, digital business acumen, collaborative working, and global operating skills. Authenticity, responsiveness, strategic perspective, and learning agility are crucial. Balancing daily operational tasks with long-term strategic actions is imperative, as is developing a growth mindset and global awareness.

Challenges for leadership include insufficient resources for developing dynamic leaders and the need for learning models linking relevant knowledge to practical application. A recommended training regime focuses on transformational, collaborative, and resilient leadership, promoting organizational agility, learning organizations, and empowered teams.

Essential leadership skills encompass emotional intelligence, assertive communication, creative thinking, complex problem-solving, critical thinking, people management, and negotiation. Effective leadership fosters adaptable, innovative, and flexible organizations, promoting discovery, diverse perspectives, and improved decision-making.

Organizations led by effective leaders benefit from openness, early detection of customer loyalty shifts, and technological opportunities. Iterative dialogues and robust collaboration enhance decision-making agility, fluid communication, and a positive organizational culture. Key success enablers include embracing change, clarifying purpose, and turning conflict into cooperation, ultimately fostering an environment conducive to innovation and sustained commitment.

I

LOVE YOUR JOB OR LEAVE IT? MAYBE THERE'S ANOTHER WAY

-knowledge.insead

Learnings:

In this INSEAD Knowledge podcast, Winnie Jiang, an Assistant Professor of Organizational Behavior at INSEAD, discusses finding meaning in any job and steering one's career in a new direction. She suggests that financial security, connections with colleagues, and satisfaction can all contribute to a sense of purpose. If a job lacks meaning, Jiang suggests reflecting on the cause and exploring ways to bring it back, such as moving to a different team or engaging in job crafting.

Jiang emphasizes that passion and purpose can be cultivated in almost any role, but you ultimately have control over your experience. Crisis can trigger a reevaluation of life's meaning, leading people to consider different ways of living, such as working less or more, or even changing careers entirely. However, this search for meaning might not always translate into a long-term career shift.

Research conducted with Yuna Cho from the University of Hong Kong suggests that crises can trigger a reevaluation of life's meaning, leading people to consider different ways of living, such as working less or more, or even changing careers entirely. However, this shift in perspective is temporary and most people return to their pre-crisis views within three to four years.

Before making a career transition, it is important to reflect on what gives your work meaning, such as particular tasks or the opportunity to build relationships with certain groups. Self-awareness and the courage to be honest about what truly matters to you are crucial for finding meaning in any job.

2

4 WAYS TO TAKE YOUR RESUME FROM GOOD TO GREAT

-workitdaily

Learnings:

A great resume for today's job market includes a branding statement, a tag line or two, relevant keywords/key phrases, and a situation/action/results writing style. Personal branding is essential for job seekers, as it encompasses not only the body, clothing, appearance, and knowledge contained within, but also the personality and value of the candidate.

To develop a branding statement, rework your elevator pitch or write a short paragraph about your professional career and value. Fine-tune the statement to contain the exact wording that helps sell you to the hiring community.

Tag lines are another crucial aspect of a resume, enabling readers to immediately see your value. They can be a group of keywords or a sentence fragment and can be strategically placed to add visual interest and white space. Taglines can also be used to include a quick "content snapshot" where blank space would otherwise appear, putting you one step closer to being called for an interview.

To identify ideal keywords and key phrases for your resume, print job ads and highlight job tasks, concentrating on nouns/actions. Cross-reference the highlighted keywords against your resume to identify any missing keywords or phrases. Focusing primarily on specific skills can help you get the job you deserve.

In summary, incorporating personal branding, tag lines, keywords, and a situation/action/results writing style can significantly increase the return of your resume and help you get the job you deserve.

3

WHY YOUR CUSTOMER EXPERIENCE STRATEGY FALLS SHORT (AND HOW TO FIX IT)

-customerthink

Learnings:

Organizations often struggle with implementing effective customer experience (CX) strategies due to several reasons. Some common reasons include lack of skills and autonomy, ownership and capacity, a toxic environment, lack of pride and purpose, and low emotional capacity.

To address these challenges, organizations can create a more positive and empowering environment for employees. By giving autonomy, allowing employees to make decisions, promoting empathy mapping exercises, enrolling all staff in a Customer Experience foundation course, assessing and improving internal culture, reiniting passion, and normalizing emotions, organizations can create a more positive and empowering environment for their employees.

At Ritz-Carlton, staff have the autonomy to make decisions to solve customer problems, which can be game-changing. Encouraging empathy mapping exercises can help employees understand the customer journey from the customer's perspective, fostering a deeper connection with those they serve. Enrolling all staff in a Customer Experience foundation course can help clarify expectations and foster a deeper connection with customers.

Assessing and improving internal culture, such as accountability and listening, can help create a more positive and empowering environment for employees. Offering employees an hour a week to pursue hobbies or teach skills can also help boost morale and connection.

Lastly, normalizing emotions in the workplace is crucial, as we are all human beings and should be valued and respected. By addressing these challenges and creating a more positive and empowering environment, organizations can improve their CX strategies and ultimately improve customer experiences.

WHAT CONSUMERS ARE SAYING ABOUT AI AND CUSTOMER SERVICE

-customerthink

Learnings:

A survey of 594 respondents revealed that 96% of them believe AI will make their life better in the future. Some are already using AI and enjoying its performance, while others expect it to accelerate the speed of getting through to customer service and answering simple questions. Some also hope that AI can simplify log-in or auto-filling forms, making it easier for seniors struggling with technology challenges.

Some have positive experiences with AI through assistants like Alexa, Siri, and Google Assistant, as well as specific tools like photo editors. Many expect AI to speed up interactions, as long wait times are a major complaint about customer service. Some hope that AI will make mundane tasks easier, such as doing routine tasks and providing more free time in personal life and work. Overall, the survey data suggests that AI will have a significant impact on consumers' lives and the future of customer service.

AI technology has been gaining popularity as it can simplify tasks like logging in or inputting information into forms. However, some respondents are hesitant to use AI assistants due to concerns about the potential loss of human interaction and the potential for job loss and accuracy failures. Some respondents prefer face-based logins, while others prefer voice assistance and chatbots to help them understand information.

Some older customers also believe AI could help them with tasks they may find difficult as they age, such as finding information online or helping with grocery lists. However, concerns about the impact of AI technology and the loss of human interaction remain.

Some respondents express generalized fear about the loss of closeness with the company and the potential for harmful effects. They also worry about the potential loss of true social interaction and the potential for mental and physical health issues due to increased dependence on AI.

Conclusion:- This qualitative research explores people's perceptions of AI and its potential applications. It highlights positive aspects such as time-saving and addressing challenges faced by seniors. However, concerns arise about AI replacing jobs or providing live customer support. By making mundane tasks less time-consuming and unpleasant, AI can make it a plus for consumers, demonstrating the importance of pleasing customers in the business of technology.

5

HYBRID WORKING: THE KEY TO A HAPPIER CUSTOMER EXPERIENCE

-customerservicemanager

Learnings:

Hybrid work is a combination of office life and home comfort, aiming to provide a happier customer experience. This approach is not just a temporary solution, but a long-term solution that benefits everyone involved.

Employees who are given the flexibility to choose their work environment, whether it's from home or in a shared office space, report higher levels of job satisfaction and engagement.

This leads to happier interactions with their colleagues, making every interaction with the company more cheerful and upbeat. An Oxford University study found that employees are 13% more productive when they're happy. Brands like Zappos and Amazon are embracing this blend of office and remote customer service.

Flexible workspaces are at the heart of the hybrid work model, offering something for every kind of worker. This flexibility not only benefits employees but also empowers everyone, fostering trust and respect that grow into stronger customer relationships.

Digital connectivity bridges the physical distance created by remote work, ensuring uninterrupted collaboration and communication. This flexibility allows businesses to welcome customers at any hour, making it ideal for serving people in various time zones or with unique schedules.

6

DRIVING DIGITAL ENGAGEMENT: THE IMPACT OF CX SOFTWARE ON CUSTOMER INTERACTIONS

-customerservicemanager

Learnings:

Customer Experience (CX) software is a popular strategy in today's business world that aims to enhance customer interactions, improve satisfaction levels, and foster loyalty. CX software includes applications and platforms that aim to create meaningful experiences for customers.

It gathers customer information at various touchpoints throughout the customer journey, enabling businesses to provide customized experiences that resonate with their customers. By analyzing large volumes of customer data, CX software enables businesses to anticipate customer needs and proactively resolve issues before they escalate.

CX software also enhances personalization by enabling experiences on a wide scale through analytics and segmentation tools, allowing companies to craft targeted marketing campaigns that resonate with audience segments or individual customers. It streamlines multichannel interactions, ensuring clear communication and effective issue resolution. CX software also allows for real-time assessment of customer sentiment, enabling organizations to swiftly identify and address any discontentment.

Building customer loyalty is crucial for businesses. CX software helps companies consistently deliver positive experiences by utilizing insights from customer behaviors, preferences, and feedback. By promoting word-of-mouth recommendations, customers are more inclined to become advocates for the brand.

Measuring progress through metrics like Net Promoter Scores (NPS), Customer Satisfaction (CSAT) score, and Customer Effort Score (CES) helps businesses assess the impact of initiatives aimed at enhancing customer engagement levels, enabling brands to continuously pinpoint areas for enhancement.

Conclusion:- Customer experience (CX) software is crucial for businesses to enhance customer engagement and maintain connections. It uses data analysis, personalized methods, and real-time emotional assessment to manage communication channels and maintain connections. Adopting CX software ensures market leadership, client relationships, and long-term growth.

10 STORES AND BUSINESSES WITH EXCEPTIONAL CUSTOMER SERVICE

-customerservicemanager

Learnings:

The digital marketplace is growing, and standout customer service is crucial for businesses to retain and attract customers. Some ten establishments that have set the bar high in customer service include Nordstrom, Trader Joe's, Amazon, Apple, Costco, Ritz-Carlton, Zappos, LL Bean, Chick-fil-A, Starbucks. Nordstrom offers excellent customer treatment, including a hassle-free returns policy and personalized attention from staff.

Trader Joe's also focuses on friendly and helpful customer service, with employees known as "crew members" who are often praised for their friendly demeanor and eagerness to help. Amazon has consistently ranked high on the Harris Poll, focusing on making customers happy through fast shipping, easy returns, and prompt customer service responses.

Apple's retail stores provide a customer service experience that matches the quality of their products, with services like the Genius Bar and personal setup services. Costco is renowned for its bulk products and exceptional customer service, with many members returning to the wholesale club for easy swapping, trust in their purchases, and friendly staff.

The Ritz-Carlton, an upscale hotel group, has consistently set a high standard for customer service, earning the Malcolm Baldrige National Quality Award twice. Zappos, an online shoe and clothing retailer, is known for its 365-day return policy and 24/7 customer service line.

LL Bean, an outdoor retailer, has a legendary 100% satisfaction guarantee policy, ensuring customers leave with a smile. Chick-fil-A, a fast-food chain, has been ranked No.1 for customer satisfaction for the 9th consecutive year, with a team always ready with a smile and clean spaces.

Starbucks, a coffee shop, stands out for its warm smiles, perfect drinks, and cozy atmosphere.

These businesses prioritize customer happiness and consistently push the envelope, resulting in awards and global customer affection. These practices not only earn consumer trust but also capture global customer affection.

WHAT TECHNOLOGY IS AVAILABLE TO ACHIEVE A 360 DEGREE CUSTOMER VIEW?

-customerservicemanager

Learnings:

A 360-degree customer view is a strategic approach to understanding and enhancing customer service. It involves integrating various data sources and technologies to create a comprehensive profile of each customer, enabling businesses to understand their preferences, behaviors, and needs. Key technologies include Customer Relationship Management (CRM) Systems, Data Warehouses and Data Lakes, Data Integration Tools, Customer Data Platforms (CDPs), Analytics and Business Intelligence (BI) Solutions, Marketing Automation Platforms, E-commerce Platforms, Social Media Monitoring Tools, Customer Feedback and Survey Tools, Artificial Intelligence (AI) and Machine Learning (ML), Internet of Things (IoT) Platforms, Contact Center and Customer Support Software, and Mobile Application Analytics.

CRM systems consolidate data from various touchpoints, while data warehouses and data lakes store structured and unstructured data. Data integration tools combine data from different sources to create a unified view. CDPs collect, organize, and manage customer data, while analytics and BI solutions help identify trends, predict behaviors, and personalize interactions. These tools also provide visualizations and dashboards for understanding and communicating insights.

POS systems capture transactional data in retail environments, while loyalty programs provide customer preferences, purchase history, and engagement. Content Management Systems (CMS) track customer interactions and personalize content, while identity resolution tools link identities across devices and platforms.

Privacy Management and Compliance Tools ensure compliance with data privacy regulations like GDPR and CCPA. Omnichannel integration ensures seamless customer experience across all channels. Predictive Analytics uses historical data to forecast future behavior, guiding marketing, sales, and customer service efforts.

However, a 360-degree customer view requires a strategic approach to data governance, quality, and integration, as well as a commitment to customer privacy and data security.

20 PERSONALITY TRAITS OF THE PERFECT CUSTOMER SERVICE EMPLOYEE

-customerservicemanager

Learnings:

In the customer service industry, identifying and nurturing the right personality traits is crucial for fostering customer loyalty. A comprehensive list of 20 personality traits that define the perfect customer service employee includes empathy, patience, communication, active listening, adaptability, attentiveness, problem-solving skills, positive attitude, product knowledge, persuasiveness, resilience, detail-oriented, professionalism, multitasking, team player, self-control, enthusiasm, curiosity, efficiency, and integrity.

Empathy is the ability to understand and share the feelings of others, while patience is crucial in challenging situations. Communication skills ensure clarity and prevent misunderstandings. Active listening helps solve customer issues by concentrating, understanding, responding, and remembering what is being said. Adaptability is essential in the fast-paced customer service environment, while attentiveness allows employees to provide tailored service and make customers feel valued. Problem-solving skills enable employees to think on their feet and devise effective solutions.

A positive attitude, product knowledge, persuasiveness, resilience, detail-orientedness, professionalism, multitasking, team player, self-control, enthusiasm, curiosity, efficiency, and integrity are essential for a successful customer service team. Focusing on these traits during the hiring process and nurturing them through ongoing training and development can help build a team that represents the gold standard in customer service.

As customer service managers, focusing on these qualities during the hiring process can boost individual performance and cement the company's status as a leader in delivering outstanding customer service.

10

3 CRITICAL SALARY NEGOTIATION TIPS FOR 2024

- workitdaily

Learnings:

The job market has evolved to an employer's market, with companies being strategic, picky, and budget conscious. To negotiate a higher salary in 2024, follow these three tips:

1. Don't negotiate salary when it's listed in the job description. Companies often have a set salary or bonus structure for new hires, so if your walkway rate is not in that range, don't apply.

2. Use evidence-based answering in job interviews to prove your value. Provide clear examples of how you achieved results in your career, using storytelling techniques like the "Experience + Learn = Grow" model. Demonstrate your unique value add (UVA) through evidence-based answering.

3. Create a two-column table to show you exceed the hiring manager's expectations and requirements. Match your experience to the job description and highlight areas where you exceed the requirements. This document can be used to negotiate a higher salary, allowing you to argue with the hiring manager if the salary is lower than expected.

The text emphasizes the importance of creating a table and using evidence-based answers in job interviews to maximize salary negotiation in the current job market. It emphasizes the need for confidence and a commitment to providing the best return on investment. The author emphasizes the importance of preparation and not winging it.

We Lounge

Mr. Sanjay Jha, CHRO

Mahindra First Choice Wheels Ltd.

Learnings

Spoke about his journey which started from year 1989 as an engineer with interestingly starting his career in blast furnace operations, arc furnace operations, induction furnace operations, to produce cast iron company. Given to understand how he started and reached to this height with various phases of learning and believing himself.

Right from the beginning he had a strong people orientation and believed that every individual has huge potential.

Quoting - His journey has been truly from molding metal to molding men”

Self exploration and focusing on opportunity as to magic happens

1997- Opportunity to work with TATA as TQM- Completed Six Sigma as Black belt- He kept upgrading with learning inline with opportunity .

He kept improvising and implementing the TQM tools and became well trained in TPM. He kept believing moved with the reaity and requirement which started enjoying his role and confidence

Best part of his career and take away - he started with positive approach and kept grabbing opportunity whether it is in HR role , Operations and other roles which helps in learning withy the ongoing world.

Shy and introvert teenager coming from Vernacular medium inspiring all with the journey and belief he kept believing and challenging to your own Assumptions and accepting to adapt any environment and challenge out of comfort zone, curious to learn and explore , excited to look beyond as Big Picture.

Truly man who has courage to talk and quote about his humble leaving and journey till coming as member of core committee.

Industry is evolving and transformation of all HR and other departments are becoming factor to change the mindset of organisation. Trying to organise with Unorganised industry – Good appropriate talent, human wellbeing is key areas.

Organisation should give more attention Engage, Groom, Retain talent as getting appropriate talent is big challenge. Today's talent looks short term career, Growing need is fast and autonomy with rocket pace learning with flexible workspace.

Happy man who have Multiply his career, learning and Remuneration in his entire 30 years journey and leave the movement with the need and enjoy you work and remove all unnecessary items from mind which will distract you from enjoying.

Tag line- moulding Metal to moulding men

Mr. Vinayak Pai, Managing Director

Tata Projects.

Learnings

Pai started his career with Aker Solutions as a trainee engineer in 1987 and served 25 years. Kept taking opportunity within and not over think and kept gabbing the same. Which help him to explore and master his skills with ongoing requirement.

Summarising with his thought- building Good teams, good support system and upskills will achieve any task which you intend in as an opportunity.

Worked with different global companies and also handles global operations in different geography which clearly stated the mind of openness and exploration in terms of accepting the task. Successfully handled and delivered the operations under his leadership with 25000 professionals which articulates and confirms that we are open and passionate so any task can be achieved.

His insight as to mapped the strategic business priorities and align them with your team and motivate them to delivered. Work together to resolve and move on and learn from the mistake. Which is best in our day to day working.

Focus more on sustainable mission to create that culture and quote our mission and vison and later demonstrate.- How we can influence and put as KPI which was one of the best way to take.

Training unskilled to skilled workers. Set some training and programme and evaluate with the performance of intended outcome of targets. Technology changes and adoption technique. Employees wellbeing and safety and work life balance programme which purely focus on the long-term business need. Open and curious and passionate and be open for any opportunity. Trust our own Capabilities comes from experience and upskills.

Given us with the more in Indian economy about Key driver is an Infrastructure which is driving the India economy. Renewable power and energy has growing and mending new era of need in India. Starting from Agriculture economy and gradually moving towards Service sector and now focusing and manufacturing hub which is a long-term mission attaining the sustainable goals. Better infrastructure makes manufacturing more efficient and viable to any country and as an organisation and leadership should be more inclined with the developing need of sustainable programme.

His approach towards work shows him responsible and dynamic nature who is constantly working to devote some good things back to society in terms of adopting sustainable practices which will help planet.

Ms. Debadutta Upadhyay

Founder & CEO, Timesaverz.com.

Learnings

Destiny can take you to the world when you have sense of confidence and strong enough to get things down. Good learning from her in terms of her journey which shows she is confident and self created women. Experience helps in taking fast and effective decision and exploration of opportunities sometimes need to be cultivated to get this into entrepreneurship but with ongoing needs.
Managing work life and balancing the professional career will give some depth bad experience which we come across and amend ways to cope up to balance the both.

There must be target and need to drive with as a life goal achievement and purpose should be the sense of responsibility which niche through Encouragement the talent and keep giving opportunities so that company can achieve target.

Practical issues have realised the requirement to society and from there the thought emerged and came into part. Digital platform which can transform the need at one box and get the convenience as per our time and turned into business.

Entrepreneur Journey should be started with both family member and Team, and both contribute to the success. Delegation is smart way to work and prioritise with our expertise. Having big picture to pursue business to height.

Acting as a leader and accepting this as wholehearted as front runner and very passionate in what we are doing. Best dive in concept and have minute details of business in terms of all aspects and done some analysis with the available monetary terms and resources. Concept and ideas can plunge the success of business.

Customer focus and addressing this gives overall experience to team as they get motivated to perform in effective manner with standardization approach.

Strong and innovated lady with focus approached and never putting yourself down easily and believing in yourself. Long terms goals are set and bifurcated into daily achievement.

Sense to change with time and with people responsibility. Live your dream and be focused.
